

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Preface

THE third annual issue of "Bank and Public Holidays" finds the world still seriously disturbed, but gradually adjusting itself to the profound changes effected by the great war. The names of many new countries appear in this volume, but in several of them the governing authorities have been too much occupied with more urgent affairs to give much attention to the matter of holidays. Every effort has been made to obtain official lists of the holidays in such of the new countries as have enacted any legislation or promulgated any decrees on this subject, while many authorities have been consulted as to the religious and secular holidays formerly observed in those regions that are likely to be perpetuated under the new regime.

As in previous editions much care has been taken to indicate the nature of the government in each instance—whether a republic, a monarchy or a colony—but in the case of some of the new countries the precise form of government has not yet been definitely determined. In a few cases the very names and permanence of the countries themselves—notably within the former Empire of Russia—are still matters of uncertainty. With very few exceptions the birthdays of royal personages have ceased to be public holidays—none of the new republics thus commemorating any of their former rulers. During the year 1919, bills were introduced in various American

State legislatures and in the legislative bodies of several foreign countries providing for a permanent holiday on November 11, the anniversary of the Armistice with Germany, but very few of these have as yet become law. Those actually enacted are noted under the respective States and countries; in many other cases the date was made a holiday in 1919 by proclamation and may be so again in 1920.

The tendency, noted last year, to suppress all minor holidays and give official recognition only to those of national importance has been still further extended—particularly among the Latin-American republics. In Uruguay, for example, Congress passed a law, effective March 1, 1919, which expressly abolished all religious holidays formerly observed and substituted the list set forth in this book. In many other countries the official observance of religious festivals is being greatly curtailed. In this edition, therefore, the religious festivals given in previous issues with an asterisk and the footnote “non-official” are omitted entirely from the chronological section and are indicated in the alphabetical section in the footnotes. Those for which no official confirmation could be obtained, and which local banks have reported as not being observed by business houses, have been omitted altogether.

In the following pages the holidays are, as heretofore, arranged in two lists. First comes the chronological list, in the usual calendar form, with the states or countries in which there is a holiday printed under the date on which the actual observance will take place. (See introductory note to the calendar for 1920 on page 9.) Then comes an alphabetical list of the principal countries and

colonies in the world and all of the States of the United States and of Australia with the complete list of holidays observed in each. Various facts of interest regarding local holidays are noted in the footnotes to the alphabetical section. Those for Australia have been greatly amplified and improved through the courtesy of officials of the Commonwealth. Particular pains have been taken to ascertain the facts regarding the observance of Election Day and Primary Day in the United States, and acknowledgment is due to the Secretaries of State of the various States for the courtesy and care with which they have responded to requests for information. Acknowledgment is also due to readers of the earlier volumes in many parts of the world who have kindly pointed out errors or suggested improvements. Similar assistance with respect to the present volume will be welcomed.

In compiling these lists the best available authorities have been consulted—usually three or four for each foreign country or colony. While every effort is made to have the lists accurate no responsibility is assumed as to the correctness of any date. The hearty reception accorded to the 1918 and 1919 editions of “Bank and Public Holidays”—which is now widely recognized as an authority on this subject—encourages the hope that the 1920 volume will be equally acceptable.

Holiday Calendar for 1920

Showing the States and Countries where Holidays are observed on each Date

In the alphabetical portion of the book each holiday is given the date that properly belongs to it, whether Sunday or not. In the following chronological section the name of the country is placed under the date on which it will probably be observed. Thus, the 4th of July falls on a Sunday in 1920, and by virtue of a special clause in the laws of practically every State in the Union the celebration of Independence Day will take place on Monday, July 5. In the alphabetical section, therefore, under each State, the holiday is given its correct historical date—July 4—with an asterisk directing attention to a footnote explaining that the next day will be the one observed. Washington's Birthday (February 22) and Memorial Day (May 30) also fall on Sunday in 1920. General Election Day (November 2) is a legal holiday in every State in the Union, but Primary Day and election days other than the general election are not universally so.

These and similar points are fully covered by the notes after the list of holidays for each State or country in the alphabetical section. In the case of religious or minor holidays occurring on Sunday no other date is given, since no further celebration of the event is probable.

Sunday is a legal holiday in every State in the United States and in all American territories and colonial possessions. It is also observed in most countries and colonies throughout the world. The general rule is not, therefore, repeated under each state or country, but exceptions to it are noted in the footnotes wherever they occur.

REPUBLIC OF CHINA—*Continued*

The Chinese New Year falls on a different day every year. It comes between January 20 and February 19, being the date of the first new moon after the Sun enters Aquarius. Each month begins with the new moon so the months average 29.53 solar days each. An intercalary month is added every third year.

POPULAR FESTIVALS IN CHINA

The following are the great popular festivals observed almost universally by the Chinese:

New Year Celebration

This is the most important holiday in China. It commences on the eve of the New Year, lasts officially for two or three days and then unofficially, in various forms, it is sometimes observed for as much as a month or more.

Tsin Min Festival or Spring Holiday

This is in celebration of the coming of Spring weather. The people observe it by going out into the country for rambles. It is observed principally by kite flying and occurs on the 28th day of the Second Month in the Chinese calendar.

Dragon Festival or Summer Holiday

This holiday occurs on the fifth day of the Fifth Month and is observed by regattas and boating sports and races. The boats are invariably decorated with dragons, whence the name.

Moon Festival or Autumn Holiday

This holiday falls on the fifteenth day of the Eighth Month. Moon cakes, a confection made in the shape of the moon, are eaten by the people. This holiday is made the occasion of family reunions—all members of the family must spend it together.

Chong Yang Festival or Mid-Autumn Holiday

This is the "Festival of the High Places," and occurs on the ninth day of the Ninth Month. Those who observe it go to the hills or mountains for that purpose. The higher the ascent, the more satisfactory the celebration.

United States

There are no national legal holidays in the United States, each State determining by act of its legislature what days shall be legal holidays within its borders. The President's proclamation makes Thanksgiving Day a legal holiday only in the District of Columbia, although most States provide by law that any date appointed by the President as a day of fasting and prayer, or of thanksgiving, shall be a legal holiday in such States. The Governor of each State is usually given power to designate certain days as holidays by proclamation.

Election Day is expressly stated to be a legal holiday in the statutes of most of the States, but is not a holiday in others. Wednesday, September 17, was officially proclaimed "Constitution Day" by the Governors of 21 States in 1919, being the 132nd Anniversary of the signing of the Constitution of the United States. In no State, however, has this date as yet been made a legal holiday and the exercises last year were largely confined to the public schools.

In this book the holidays for each State and Territory in the Union, and for each American possession overseas will be found in its respective alphabetical order.

Under the Negotiable Instruments Law now adopted by every State in the Union a negotiable instrument is payable at the time fixed therein without grace. When the day of maturity falls upon Sunday or a holiday, the instrument is payable on the next succeeding business day. This Law has also been adopted by Congress for the District of Columbia, and in Alaska, Hawaii and the Philippines, but has not yet been adopted in Porto Rico.
